

Hailey Xue

xuexd0211@g.ucla.edu | LinkedIn | 4244076868 | Irvine, CA

TECHINICAL SKILLS

Programming: Python, SQL, R, PySpark, Pandas, NumPy.

Data Engineering: ETL/ELT Pipelines, Data Wrangling, Databricks, MySQL, Kafka, Data Validation, REST APIs.

Statistical & Machine Learning: Regression, Classification, Clustering, Feature Engineering, scikit-learn, Propensity Score Weighting.

Visualization & Applications: Tableau, R Shiny, Matplotlib, ggplot2, Flask.

Cloud & Engineering: AWS, Docker, Git, CI/CD, Agile Methodologies.

AI/ML: PyTorch, TensorFlow, Hugging Face Transformers, RAG, Vector Databases, LLM Fine-Tuning & Evaluation, Prompt Engineering.

PROFESSIONAL EXPERIENCE

Data Scientist, AI Consulting

Ghamut Corporation

October 2025 – Present
East Lansing, MI (Remote)

- Built AI-powered document processing pipelines that converted documents into searchable, structured databases, enabling users to quickly RAG-retrieve evidence from large volumes of unstructured text.
- Developed LLM-backed backend APIs for a decision-support platform, including document Q&A, record summarization, and a branched multi-step appeal drafting workflow that improved successful case outcomes from 46% to 73%.
- Analyzed employee workflow across ~156K cases and 29 sites to identify manual processes that slowed productivity, finding the automation opportunities that could replace ~47% of manual labor burden and ~42% of labor cost.
- Quantified and communicated the business value of our AI product to client leadership through a monthly impact dashboard tracking improvements in appeal success rates and attributable dollar gains.

Graduate Researcher

UCLA Health

June 2024 – Present
Westwood, CA

- Built Python ETL pipelines to ingest, clean, validate, transform, and tokenize 14,000+ clinical records from AWS S3, producing standardized datasets for downstream statistical analysis and machine learning.
- Fine-tuned and benchmarked three predictive NLP models across 110 clinical outcomes using PyTorch and Hugging Face Transformers, achieving macro-F1 = 0.83 and contributing to a first-author medRxiv preprint.

Data Analytics (Intern)

Himalaya Wellness Company

December 2021 – May 2022
Singapore

- Extracted, cleaned, transformed, and validated Excel data to build forecasting models, budget scenarios, and centralized Tableau dashboards, improving data quality, reducing reporting errors, increasing data access speed by 5x, and contributing to a 5.1% revenue increase and 8.3% cost reduction.
- Collaborated with finance, operations, and sales teams across the Asia-Pacific region to define project-specific KPIs, support forecasting and budgeting, and present insights to stakeholders for alignment and adoption.

PROJECT EXPERIENCE

Technical Lead

Prenosis

Mar 2025 – Jun 2025

- Queried relational databases with SQL and transformed outputs with dplyr, reducing application response time from minutes to seconds through standardized data modeling and preprocessing.
- Built an interactive R Shiny dashboard with modular components, global filters, timeline views, and ggplot2 visualizations to support efficient record review and decision-making workflows.

EDUCATION

University of California, Los Angeles (UCLA), Master of Data Science in Health

June, 2025

- GPA: 4.0/4.0.

National University of Singapore, BS in Business Analytics (with Honors)

2023
